SUMMARY

B.Tech Artificial Intelligence and Data Science student graduating in 2027, focused on AI automation, agentic systems, RAG applications, and workflow orchestration. Builds production-style AI systems using LLMs, n8n, APIs, vector search, and structured automation outputs. Experienced with Python, JavaScript, REST APIs, Groq/OpenAI/Ollama APIs, LangChain, LlamaIndex, FastAPI, ChromaDB, Google APIs, n8n, Make, and Zapier.

EDUCATION

Guru Nanak Institutions Technical Campus - B.Tech in Artificial Intelligence and Data Science 2023–2027
GPA: 7.0 / 10.0

EXPERIENCE

Multi-Agent Research Automation System *n8n, Groq API, React, Google Sheets, Webhooks, JavaScript*

- Engineered a 3-agent research pipeline with Researcher, Summarizer, and Formatter agents that generates structured markdown reports in about 4 seconds for medium-complexity queries.
- Orchestrated n8n webhooks, Groq LLM calls, Google Sheets logging, and a React interface with research history, markdown rendering, copy actions, and report downloads.

Autonomous Business Workflow Automation System *n8n, Python, Ollama, Gmail API, Google Sheets*

- Built an AI email classification and routing workflow that detects customer intent and validated correct routing on a test batch of 70 emails using n8n, Python, Ollama, and the Gmail API.
- Logged categorized results to Google Sheets in real time and added a plain-English analytics layer so business users can understand email activity without reading raw workflow logs.

HireFlow AI - AI Recruitment Automation Agent *n8n, Gmail API, Google Sheets, Google Calendar, LLMs, JavaScript*

- Built an AI recruitment agent that screens and ranks 20 resumes within 5 seconds per trigger by extracting PDF resume text from Gmail and scoring candidates against a job description.
- Designed an evidence-required LLM rubric returning matched skills, missing skills, score, recommendation, and recruiter summary while preventing hallucinated skill matches.

AI-Powered Document Intelligence System *Python, LlamaIndex, FastAPI, React, ChromaDB, RAG*

- Built a RAG system for PDFs up to 40 pages with source-grounded question answering using LlamaIndex chunking and indexing with SentenceSplitter and VectorStoreIndex.
- Implemented ChromaDB vector search and retrieval-confidence guardrails by inspecting source-node similarity scores before accepting generated answers or returning fallback responses.

OpsPilot AI - Autonomous SRE and FinOps Command Center *Agentic AI, Cloud Monitoring, Cost Analysis*

- Designed an autonomous SRE and FinOps command center that simulates cloud incidents, performs AI-based root cause analysis, estimates cost impact, and generates downloadable incident reports.
- Built health-status checks and next-best-action recommendations to demonstrate agentic AI support for DevOps reliability, incident response, and cloud cost-optimization workflows.

SKILLS

Programming: Python, JavaScript, SQL

AI / LLM: OpenAI API, Groq API, Claude, Gemini, Ollama, LangChain, LlamaIndex, Prompt Engineering, RAG, Function Calling, JSON Output Parsing

Agents and Automation: Multi-Agent Systems, Agentic Workflows, n8n, Make, Zapier, Webhooks, REST APIs, Workflow Orchestration

Business Automation: Lead Qualification, Customer Engagement Workflows, CRM Follow-up Automation, Email Automation, HR Automation, Resume Screening, Interview Scheduling

Backend and Data: FastAPI, PostgreSQL, MongoDB, Pandas, NumPy, Scikit-learn, Data Cleaning, EDA, Google BigQuery

Frontend and Tools: React.js, Streamlit, Tailwind CSS, Responsive UI/UX, Git, GitHub, VS Code, ChromaDB, FAISS, PDF Text Extraction

ACHIEVEMENTS & ACTIVITIES

- Completed current certifications spanning quantitative research, AI fluency, GenAI data analytics, AI in Action, and Claude fundamentals.
- Maintains a public portfolio of AI automation, agentic AI, RAG, and workflow orchestration projects with recruiter-facing project explanations.
